## Music notation programs and music programs

- 1. Music software
- 2. A criterion to use when you compare music notation programs

## 1. Music software

## 2. A criterion to use when you compare music notation programs

You will spend much time with your music notation program. This time is worth much more that what you pay for a music notation program. Be sure that the program you choose can write a *music notation exchange format*. This also holds for free versions.

The best export formats at the moment are *NIFF*, *MusicXML*, *abc* and *SCORE*. Others are possible, but not *MIDI*, that loses almost all visual information.

The internet is built on open standards.
